AND SMELTER NEWS

BOOM IN COPPERS IS NEAR AT HAND

Five Million Pounds of the Metal Sold at the High Figure.

CAUSE FOR MUCH REVELRY AMONG LOCAL PRODUCERS

Copper Shares Headed for High Places, According to Eastern Oracles.

A bulletin from New York during the day tells briefly but with striking emphasis of the sale of 5,000,000 pounds of ake copper at 1519 cents a pound. The sale was made by one of the large Lake Superior producers, presumably the Calumet & Hecin, whose peg was recently advanced to that figure, although the agents who promoted the transaction reagents who promoted the transaction refuse positively to divulge the hame of either seller of purchaser. With this condition in the East and the demand for the metal hourly increasing, there is much to forefell an advance in the local settling price, although it continues under the classification of "casting," which has been, as a rule, the last to recognize the presence of an improved market. The tips indeed, during the day over the private wires of Pollock & Co. are all premonitory of even further advances in the price of the metal. Among local producers the situation has been the signal for not a little revelry. From it they are deriving their share, while the investor who correctly interpreted the writing which has been held up to him for some time and loaded up, is permitted to exult over all kinds of profits. No one has been convinced, however, other than that better prices for copper shares are coming.

Telling of conditions in the copper mar-ket as they appear in New York, Messrs. Horublower & Weeks, in a message over the private wires of James A. Pollock &

Hornblower & Weeks, in a message over the private wires of James A. Polick & Co. sar:

"Several prominent copper men, with whom we have talked very recently, have assured us "that the supply of copper for early delivery, is completely exhausted; and one gentleman particularly well pested told us positively, only this morning, that it is impossible to buy copper for delivery earlier than November or December. In view of this, the sharp advance during the last week in the London quotation for the metal is scarcely to be wondered at This morning, as you know, the London market opened un shillings and 9 pence and closed with the quotation fee is shillings for spot and fee for futures. This certainly shows a wonderful improvement from the low price of last year—55 5 shillings. A high price for the metal, therefore, seems to be assured for some time to come, a condition which must be most gratifying to the holders of copper shares. The dividend-paying companies should, under the circumstances, still further increase their disbursements to stockholders, and the prospects of developing properties are also wonderfully enhanced by the great advance in the metal. A year ago this month copper was worth about 12% cents an advance of 21 per cent. The effect of this increase in price on the producers is shown as follows: Estimating the cost of copper to the Wolverine company 4.7 cents a pound, 194-cent copper, compared with 124-cent copper, means an increase in copper of over 50 per cent. In the case of Quincy and Osceola companies, the copper cost of which last year was 10 cents, an increase in profits of 100 per cent. It is patent that the copper shares have not responded to any degree to the improved selling price of the metal."

Others from whom comment came during the day, were equally its buoyant. Others from whom comment came dur-ng the day, were equally as buoyant,

ing the day, were equally as buoyant, and that the prophets are to be sustained there is everything to foretell. COL. HENSHAW ILL.

Succumbs Without Warning to an Attack of Asthma.

Overcome by an acute attack of asthma while issuing from the postoffice yesterday morning. Coi. Joseph Henshaw, secretary of the Imperial, the Manhattan and other companies under the supervision of Hon. A. B. Lewis is confined to his home, with a physician in attendance. Fontunately for Coi. Henshaw Dr. Anderson was passing at the mousent he succumbed, and with the administration of restoratives his friends succeeded in getting him to his offices in the Pooly block, where he railied quickly. The paroxysm came on without premonition whatever, Coi. Henshaw having walked as usual from the breakfast table to his box in the postoffice. A large circle of friends hope to see him back at his desk at the earliest possible hour. Overcome by an acute attack of asthma

OHIO COPPER FORPHYRY.

Native Metal Occurring Freely in Its Many Fractures.

In ploughing its way through the perphyries from the 400-foot level on the All's Weil ledge the management of the Ohio Copper company is repeating to a large extent the story which has been told by the neighbors. Not only is the perphyry itself disseminated with the metals, as it is upon other pertions of the zone, but in the fractures are found sheets of native copper with a red oxide, which said Superintendent Ziegler yesterday, is adding not a little to the resources. At a depth of 60 feet the level continues to advance east in opes of fine quality, while the mill is contributing more freely to the needs of the company than at any period since it went into commission. ploughing its way through the

Ore and Bullion.

In the ore and bullion market the day's settlements amounted to \$78,200, McCornick & Co. reporting them as they follow: Bullion, \$19,200; gold, silver, lead and copper ores, \$23,709.

In the metal market silver ruled at \$5% c an ounce, lead at \$3.5064.50 per 100 pounds and casting copper at 14% c a gound.

Nothing on the Market Equal to Chamberlain's Colic, Cholera and Diarrhoea Remedy.

This fact is well known to druggists everywhere and nine out of ten will give their customers this preparation when the best is asked for. Mr. Obe Witmer, a prominent druggist of Jop. lin, Mo., in a circular to his customers, says: "There is nothing on the market in the way of patent medicine which equals Chamberlain's Colle, Cholera and Diarrhoea Remedy for bowel complaints. We sell and recommend this preparation." For sale by all leading druggists.

WEALTH OF OLD ELY WILL HAVE AN OUTLET

Railway to Be Followed by Equipments With Mills and Furnaces.

With the assurance of J. Parke Channing, the expert mining man and mining engineer, that the resources with which to justify it are present at Ely, M. L. Requa, general manager of the Nevada Consolidated Mining company, whose copper-bearing estate is located in that Nevada camp, hast made the announcement that the projected line of railway between Toona and his diggings is to be built. The distance that will thus be spanned is 140 miles, the rails from the camp connecting with those of the Southern Pacific at Toona. In the absence of heavy biasting the new road, in the opinion of Mr. Requa, will be in operation by January 1 next, and to dispatch construction contracts will be awarded at an early day. Not only will the old camp, whose metallic wealth has been pleading for an outlet for many years, be provided with a railway, but, as told last week in The Tribune, the Nevada Con company will proceed at once with the equipment of its mines with mills and smelter. That others will undertake as much there are many assurances, and that the camp will attain all for which it has been striving, many are prepared to believe. For the consummation of all that has been projected by his company, a friend of Manager Requa says he has at his command all the wealth that shall be required, and as the undertaking will receive his personal attention, there will be no delays. o justify it are present at Ely, M. L. Requa, general manager of the Nevada

NEWFOUNDLAND GOLD.

Utah-Nevada Company Uncovers a Rich Streak.

special to The Tribune

OGDEN, Aug. 2.-Lewis Cunningham of

Special to The Tribune.

OGDEN, Aug 2.—Lewis Cunningham of the Utah & Nevada company, whose properties are located in Newfoundland district, across the lake, returned to Ogden this morning, and reports that not only the drift, but the winze is in a full face of cre.

Recently a miner working for the company came into Ogden exhibiting specimens of high-grade gold ore, which he claimed he had taken from the hamping wall of the workings. It was literally full of gold, and, as he described it, was about half an inch thick on the hanging. The visit of Mr. Cunningham was to ascertain just what truth there was in the miner's report. The company has plenty of high-grade gold specimens exhibited by the party, and was not prepared to accept the report without confirmation.

Mr. Cunningham was gratified on his arrival at the camp to discover that the find was in howise exaggerated. He found a streak on the hanging wall, of varying width, which is excessively rich in gold. Samples he brought back with him are impregnated with the yellow metal, and of itself it is a working proposition.

Meantime the drift and winze are being pushed in ore that markets for from \$55 to \$55 per ton, with a higher grade

ing pushed in ore that markets for from \$5 to \$65 per ton, with a higher grade running to \$50.

BINGHAM'S PORPHYRIES.

Mining of Them Analogous With Conditions in the North.

"The working of the very low-grade opper deposits of Bingham will introduce there a condition of mining analogous to what exists at Lake Suanalogous to what exists at Lake Superlor, where immense tonnages of copper ore of very low grade are worked, and in the disseminated district of southeastern Missouri, where low-grade galena ore is exploited on a large scale, the value of the crude ore in both cases, being not very different from that of this disseminated copper ore of Utah, the Utah mines having the great advantage, however, that their ore can be extracted to a large extent by open-cut work," says the Engineering and Mining Journal, after a lengthy clinic on the camp of copper, the occurrence of its ores and their metallic contents. Other companies in the district, besides the Utah Copper company and the Boston Consolidated, have large deposits of this low-grade ore,

in the district, besides the Cun Copper company and the Boston Consolidated, have large deposits of this low-grade ore, and the operations of the ploneer companies will, therefore, be followed with especial interest."

Of the copper-bearing perphyries, the area is not so extensive as some would depict. On the contrary, the impresnation of it to an extent that is commercially significant is confined to certain zones striking through the main one. Every individual nor every company with a block of perphyry is not the possessor of resources such as have been and are being developed by the Utah Copper and Beston Corr, nor do these companies monopolize the "good perphyry."

DEMAND FOR COPPER.

Metal Must Be the Carrier for the Electric Current.

It has been apparent for many years? that the destiny of our civilization is to be served by electricity—a destiny that in any event cannot be remote. It has been equally apparent that copper (aided somewhat by its colleague and rival, aluminum) must be the carrier of the electric current, says the Engineering and Mining Journal of New York. The stupendous dimensions of the necessity and opportunity suggested by this observation are matters of daily comment, and yet the conscious genius of trade seems not yet to realize fully the ultimate significance; the market reflects, mainly a resultant from forces that represent large capital, ambition, foresight—and perpetual timidity. A remarkable feature of the recent copper production is that no great visible surplus of metal has been accumulated. The increasing demands of electric construction and supply still live in a haphagard way, from hand to mouth. Capital cannot afford to trust the future in supporting the expense of large stock locked up. Meanwhile, the immediate demand continues strong, and among the assuring indications of confidence in the market is the increased dividend of the largest copper combination in the country. Whatever may be the motive which prompted this only partially anticipated generosity, it is safe to say that it would that the destiny of our civilization is toprompted this only partially anticipated generosity, it is safe to say that it would hardly have occurred on a falling market.

ALONG THE WESTERN.

Some Mineralization, but Out of the

Present Market. an argentiferous lead ore of the value of \$16 per ton might be made to afford a margin to the Tintle or Bingham miner, it cannot be profitably mined and marketed with a 140-mile haul between it and the railway, said W G. Nebeker, whe has been experting a group of prespects that was recently commended to his clients—a prominent railway official leading them—by a Nevada owner. It was along the line of the preliminary survey for the Western Pacific that Mr Nebeker and his party found the group, and will pass that way, the syndicate could not induce itself to believe that it was justified in the investment, and returned to await something else. The region is being quite actively praspected since the stakes for the Western Pacific were driven, and that a number of camps will result there is no doubt. value of \$16 per ton might be made to afTHE DAY ON 'CHANGE

Lower Mammoth Again Turns Its Nose Up the Pike.

The day's business on the mining exstock, that brought \$3593.87. Lower Mamstock, that brought \$5593.57. Lower Mammoth, profaned in all kinds of languages a few hours before, again demonstrated its strength, and from an opening at 25 advanced as rapidly as it had declined to \$15 cents, with the market absorbing all in sight, while Carlsa was marked down to \$175 cents, with Sliver Shield hovering around 24 cents. Victoria, on which its adherents are relying for a piece of pin money the present month, accommodated a customer at \$2.10, while for \$29 New York the buyer was required to shell out 54 cents. In the sparring Engie & Blue Bell was marked up to \$2, with Boston Con, holding out for \$5.00, with \$415 cents asked for Uncle Sam and 69 for Con. Mercur, the day closing on the following market:

Lot of 390 Tons Brings the Management Approximately \$8500.

THE OLD STOPES AND NEW PROVING UP BIG DEPOSITS

Eight Tunnels Now Forging Ahead in the Copper-Bearing Porphyry.

The management of the Boston Con. of Bingham marketed during the day 250 tons of ore, of a gross valuation of nearty \$8500, the controls showing as much a \$10.70 gold, with \$1.95 in silver, 3.4 per cent copper and 16 per cent iron excess. As ar example of that of which the copperbearing acreage at Bingham is capable
the lot from the Boston is a useful one.
Ores of better quality are expessed in the
camp, but none that exceed—in tonnages
with which the Boston is reporting at the
furnaces—its autiferous contents. At
present the company is drawing upon its
stopes, said Manager Louis S. Cates, who
come in from camp yesterday morning,
for an average of about 250 tons daily
and did the facilities for the reduction of
a larger volume than this, it would be as
easy to respond without increase whatever in the present roster. The Cates
stope on the Peabody level affords a particularly impressive lesson on the occurrence of smalling ore in the tremendous
zone, nor has the actual extent of the ore
body there been yet determined. Above
this level 110 feet and at the extreme
workings on the east is the Kaffle stope,
in which there is also exposed some very
fine "ehipping ore," the feature of this
that the developments are occurring in a
section hitherto unexplored. Sixty-two
feet above Work tunnel is another strong
body of ore of good quality, another
striking demonstration of the presence of
copper, gold and sliver-bearing ores in
mass. In other portions of the Boston
Con's territory are lessons equally as intoresting, said Manager Cates.

The campaign in the copper, gold and
sliver-bearing porphyries continues along
the most energetic lines and with most
satisfactory results. The future productiveness of this division in the company's realm and the profits that shall
begin to pile up with the competion of
the mill at Bostonia, on the margins of
Utah lake, is now positively assured.
In all the camp a more striking example of
its activities or a more significant premention of the tremendous tonnages that
are to follow.

MUCH FREE GOLD. example of that of which the copper bearing acreage at Bingham is capabl

MUCH FREE GOLD.

New Discovery Followed by Another Big Rush. A message from Olinghouse, out of Re-

no, Nev., indicates an extraordinary discovery of gold in that old district, just now beginning to experience a new life. The discovery is reported in the Ora group, which is being prospected under a \$5,000 option, running in favor of De-Witt Boveo and associates of Pittsburg. Pa. It was while driving a tinnel to intercept the ledge by which another group is flasured that the rock was uncovered. It was at a distance of 150 feet from the mouth of the tunnel and seventy-five feet below the curface. At this point, according to a message in the Reno Gazette, that nuggets of gold began to appear. They found that the heavy stringers of the precious metal ran entirely across the tunnel, a distance of ten feet. Several of beam are as large as the palm of the hand and almost pure gold. As soon as the strike became known it caused a stampede to the vicinity of the mine. Claims are being staked out by hundreds of men, who are leaving other parts of the district to investigate. Old prospectors who looked at the property say the strike is one of the most important ever made in the State.

The Reno Journal says the rich streak affords samples assaying from \$6,000 to \$12,000 per ton. A miner from the camp says the pannings showed values from \$60,000 to \$50,000 per ton. covery of gold in that old district, just

Mining Notes.

Cashier Hayes of the Utah Copper company yesterday received a check for five more car-loads of high-grade copper, gold and silver-bearing concentrates from the company's big mill in Bingham canyon.

The sale of the Balakiaa mine under the option held by the Bingham Con. people to a syndicate headed by Clarence Mackay, is looked upon with great favor by the people of Shasta county, because it is now condently expected that a large smelter will be erected at once says a correspondent, writing from San Francisco.

The work on the 700-foot level at the miax of Tintic continues with most encouraging results. Not only is ore exposed in the face, but in several other places.

Manager H. H. Channing of the Utah Conleaves for Bincham this morning to measure up the new ore-bedies on the 600-foot level and in northern territory which is now awakening so much interest.

ening so much interest.

Jack Burke is down from Idaho again, more portly than over, and reports much capital headed for the digrinus of that State.

C. H. Deolittle, manager of the Bingham & New Haven, left for its properties at Bingham yesterday morning.

W. J. Craik, manager of the Kennebec company's Alta properties, has returned from camp, much pleased with conditions there.

H. W. Foster, manager of the Sayles Co.

R. W. Foster, manager of the Sevier Con. of Gold Mountain, has awarded the contracts for its new mill at which to reduce its gold-bearing ores.

George H. Robinson, managing director of the Tintle company, left for the Yampa mines and smelter at Hingham yesterday morning.

Measure Hanchett and Bettles have returned from Newhouse. Charles H. Anderson of the Denver & Rio Grande has been made secretary of the White Rock Placer Mining company, which prom-less a new record in the clean-up of gold the

NOTICE OF ASSESSMENT.

Trout Creek Mining company, principal place of business at Sait Lake City, Utah. Notice is hereby given that at a meeting of the board of directors, held on the 12th day of July, 1306, an assessment of one-quarter (%) cent per share (being assessment No. 1) was levied upon the capital stock issued and cutstanding of the corporation, payable immediately to H. F. Robinson, secretary and treasurer of said company at als office, 133 South West Temple street, Sait Lake City, Utah.

of said company at his office, 133 South West Temple street, Sait Lake City, Utah.

Any stock upon which this assessment rhall remain unpaid on Saturday, the 12th day of August, 1995, will be delinquent and advertised for saie at public auction, and unless payment is made before, will be sold on Monday, the 28th day of August, 1995, to pay the delinquent assessment, together with the cost of advertising and expenses of sale.

H. F. ROBINSON,

Secretary and Treasurer,
133 South West Temple, Sait Lake City, Utah.

NOTICE OF STOCKHOLDERS' MEETING.

Notice is hereby given that a special meeting of the stockholders of the Dexter-Tuscarora Consolidated Gold Mines company, a mining corporation, is hereby called, to be held at the principal office of said company, at room 504 Auerbach building. Sail Lake City. Utah. on the leth day of August 1905, at two (2) o'clock p. m. of said day.

The object of said meeting being for the purpose of ratifying or rejecting a certain agreement entered into by the officers o' said company, for the sale of its mining and other properties, situated in Elko county, Nevada, and to authorize the officers of said company to carry into effect said agreement and to make proper deeds of conveyance therefor, all in conformity with the law of the States of Utah and Nevada.

Done this Sth day of July, 1905.

Dexter-Tuscarora Consolidated Gold Mines company, by

L. D. LEE, Secretary.

Dexter-Tuscarora Consolidated Go Mines company, by L. D. LEE, Secretary, E. H. AIRES, S. B. MILNER, k575 JOHN DERN, Directors.

NOTICE OF ASSESSMENT.

Mason Valley Copper company, location of principal office, Salt Lake City, Utah.

Notice is hereby given that the board of directors of the Mason Valley Copper company, a corporation of Utah, at its meeting held on July 6, 1905, levied an assessment of 5 cents per share on the 69,600 shares of capital stock of said corporation subscribed for and not placed in the treasury of the corporation, payable immediately to Robert S. Conners, treasurer of the company, at the bank of Walker Brothers, corner Second South and Main streets, Salt Lake City, Utah. Any of said stock upon which said assessment may remain unpaid on the 10th day of August, 1905, shall be delinquent on the 11th day of August, 1905, shall be devertised for sale at public auction; and unless payment is made before shall be sold on the Sist day of August, 1906, to pay the delinquent assessment, together with the cost of advertising and expense of sale.

By order of the board.

THE STATE CHEMIST. HERMAN HARMS, Ph. G. SAYS OF THREE CROWN

BAKING POWDER:

"I have purchased in the open market a can of your Three Crown Baking Powder, and submitted same to a careful chemical analysis.
"Have found the powder to be a 'PURE CREAM OF TARTAR BAKING POWDER,' absolutely free from Alum, Lime, Ammonia or other foreign admixtures. "All of the ingredients are of the purest quality obtainable and combined in proportions to make the powder of exceptional high 'leavening strength Respectfully, HERMAN HARMS."
